AI WEEKLY PLANNER AND TASK PRIORITISER

1. Aim

To create an AI-based weekly planner that organises tasks and prioritises them according to importance, urgency, and deadlines.

2. Tools Used

- Google Gemini
- Google Sheets

3. Procedure

1. List academic, internship, and personal tasks.
2. Enter the tasks into Google Sheets.
3. Assign priority levels: High, Medium, and Low.
4. Use Google Gemini to analyse tasks and suggest a weekly schedule.
5. Review the AI-generated priorities and improve the timetable.
6. Track each task using Pending and Completed status.

4. Output

The system generates a weekly timetable from Monday to Sunday, assigns task priorities, and identifies important tasks that should be completed first.

5. Advantages

- Improves time management.
- Helps complete urgent tasks on time.
- Reduces confusion in planning.
- Balances academic work and personal activities.

6. Result

The AI Weekly Planner and Task Prioritiser was created using Google Gemini and Google Sheets. It helps students organise weekly activities, identify important tasks, and manage time efficiently.
